

Club Calendar 2020-2021

Over the past year and a half, we have used a Google calendar for our Club Events. We did not use the built in Visual Pursuits calendar because it was not possible to subscribe to it and have it show up in your personal calendar.

Recently, the Visual Pursuits vendor added the ability for members to subscribe so we are going back to the Visual Pursuits version of the calendar. The competitions integrate with and it is easier to maintain.

The website has been updated so that the “Calendar of Events” link on the home page and the “Club Calendar of Events” submenu item of the About Us menu takes you to the correct calendar.

While you can view the calendar on the website, the best thing to do is set up your personal calendar to subscribe to this calendar. Then, when meetings change or something is added or deleted, you will get the information RIGHT IN YOUR OWN calendar!

The following text looks like a link, but it is not a website link that you put into a browser or click on. This is entered into your calendar program when subscribing.

<https://stlcamerclub.com/iCalendarFeed.aspx?F=1>

Here are some notes on how to use this to add it to a calendar:

Mac OS

Calendar -> File -> New Calendar Subscription. In the dialog box that pops up paste the URL above in the Calendar URL field. Follow the dialog to add this calendar. The default name is “ALL” and you may want to rename to something more meaningful.

Windows/Outlook

Go to the Calendar tab/window and your existing calendars will appear. In the top ribbon, click Open Calendar. Sub menu opens and select From Internet. This opens a dialog box which requests the link. Paste the link from your clipboard and hit OK.

If you use Google calendar, just add the calendar from a URL, using the text/URL above.

There may be an option to set how often the calendar is refreshed, except for Google. This should probably be set to at least weekly, but I use daily.

If you previously subscribed the Club Google calendar:

You should remove that subscription from your calendar. It will not contain any new events and is obsolete; no need keeping it around.
