

Change/Enhancement to the Calendar

In an effort to provide a better Calendar, the Club events have been moved to a Google Calendar. The website has been updated. The big benefit of using Google Calendar is that it is possible for members to subscribe to it and receive all updates. This way, when meetings change, something is added or deleted, you will get the information RIGHT IN YOUR OWN calendar!

The following is technically a link, but it is not a website link that you put into a browser. It is used to subscribe to the calendar.

<https://calendar.google.com/calendar/ical/n4212hm4vj8npvt2o8lcvr65fs%40group.calendar.google.com/public/basic.ics>

Note: When you copy and paste this, make sure there is not a blank in the middle of this text (where the line break is). There is an issue with word wrap when exporting to PDF and I have not figured out how to fix it.

Here are some notes on how to use this to add it to a calendar:

Mac OS

Calendar -> File -> New Calendar Subscription. In the dialog box that pops up paste the URL above in the Calendar URL field. Follow the dialog to add this calendar. The default name is "ALL" and you may want to rename to something more meaningful.

Windows/Outlook

Go to the Calendar tab/window and your existing calendars will appear. In the top ribbon, click Open Calendar. Sub menu opens and select From Internet. This opens a dialog box which requests the link. Paste the link from your clipboard and hit OK.

If you use Google calendar, just add the calendar from a URL, using the URL above.

There may be an option to set how often the calendar is refreshed. This should probably be set to at least weekly, but I use daily.
